The Patinas Lighting chandeliers

It all began in 1981 in Budapest: a time of epochal changes, in which intuitive people early perceived the cultural revolutions that would have turned laws and market dynamics upside down. Károlyi György was one

of them. He used to wander through auctions, markets and fairs, looking for lamps and chandeliers. No matter how good their conditions were: he could perceive their value and elegance from a distance. He would choose, treat, restore and resell them. After a few years, he decided to create his own line, supported by a handful of craftsmen. That's how his knowledge and experience crossed the borders of Hungary.

Chic&Enlightened

Since then, many things changed. Nowadays his son manages a modern company, which works on international markets without sacrificing its artisanal quality. [Patinas Lighting](#) is an **Art Nouveau** and **Art Deco** lamps manufacturer. There's a waiting list for them since they are all custom-made with quality materials. Deco chandeliers descend from the large vaults of Budapest's big hotels, evoking *Gatsby's*

splendour. Elaborate table lamps reveal cards and documents. Stylized wall lights illuminate coffee shops or yacht clubs. Remarkable places like the Budapest Parliament or the Kremlin in Moscow already chose Patinas. And you? Do you want to brighten your home?

Bravi Patinas!
